Since 1972 we have been at the service of Institutions, Companies, single citizens and the public in general to guarantee the essential premise for the development of our country: Security. Every day we put our skills and our professional capacities on the net to deal with risk factors of whatever kind. We do this while looking constantly forward in time and space, to new ideas and technological progress. Passion and experience have made the DAB Group a great Italian company. That is why, for more than forty years, your Security has begun with us…”

The President
Pierluigi Aloisi
Security begins with DAB.
The DAB Group, a leader in the Security, Safety and Technological Control market, believes strongly in the importance of the Culture and Ethics of Security.

For over forty years we have dealt successfully with the problems linked to the protection of People, Goods and Territory, combining synergically every aspect of our skills: Research, Development, Consultancy, Planning, Security Systems Implementations, Technological Control, Telemonitoring and Surveillance, Training.

We make preliminary, precise assessments of critical points and define solutions, combining knowledge, skills and technology.

Strategies, goals, project systems and processes are all established by prior agreement with our Customers.

We plan every typology of action with the greatest care, implementing swiftly the most effective means to satisfy concretely every expectation of prevention and control.

Our know-how enables us to rationalize investments and running costs while maximizing the results in terms of Real Security.

We operate throughout the national territory. Our professionals located in our offices in Rome, Bologna, Milan and our Territorial Assistance Centres (CAT) ensure 24/24h availability.

At a time marked by new threats and daily situations of risk, we work to guarantee what means most to us: Your Security.

By choosing DAB Group you choose a Security Partner.
The horizons of our work launch us into the World. Our starting point is the social and territorial realities we have always protected.

The Security challenge can be won only by arriving in advance of every potential threat and successfully providing immediate, adequate and lasting solutions, aligned to the highest standards of quality and reliability.

With this in mind, the DAB Group has founded the first “Security Technological Pole” in Italy: a centre of absolute excellence satisfying every Security need through promotion of scientific and industrial research and exploitation of the finest professional skills.

Our work develops in line with certified protocols guaranteeing our reliability.

Our attention towards governance of innovation and our ability to meet market challenges are the keys to our Group’s success. Our Security model provides an Advanced Integrated Security System - SIA, based on platform that enable communication with the outside world. Analysis and correlation of the information gathered give added value to the control process.

We give concrete form to winning, innovatory ideas that are set to anticipate the future and find application in the widest range of territorial and industrial environments, optimizing the competitive, economic and incisive profile of our proposed solutions.

By choosing the DAB Group you choose the path of excellence.
DAB Group, your Security Partner

DAB Sistemi Integrati S.r.l.
Research and Development

The Research and Development company division of the Gruppo DAB promotes scientific innovation with high technological content and continual implementation of the supply of services, drawing on qualified human resources and specialized technical personnel.

Part of these activities are dedicated to identifying and testing increasingly innovatory solutions in the fields of Security, Safety and Technological Control. Our research keeps us constantly in touch with the scientific and industrial avant-garde.

The creation of new applications is supported by a series of strategic partnerships with the best public and private research centres, in Italy and abroad.

The Division’s goal is to implement:

- significant research projects
- collaboration and interchange with University professors, professionals and research bodies and institutes to increase scientific and industrial knowledge
- ongoing research and experimentation in new technologies, products and solutions

The experimental Research and Development laboratory combines professional skills and technologies for the development of new Security solutions.

Analysis and Planning

Highly skilled human resources and a consolidated stock of experience are available for the implementation of basic and detailed projects as well as feasibility studies on all that relates to Security, Safety and Technological Control.

The Division’s activities cover engineering, elaborations of technical specifications, works management, tests, assessments and audits.

It also deals with planning in every operative context and attends to every phase of implementation. It deals in particular with:

- Urban Security Systems
- SCADA System
- Telecommunication Networks
- Environmental Monitoring Systems
- LAN Cabling, Automation System, Electrical System
- Supervision Systems and Control Room

The work team guarantees complete efficiency and functionality of the Systems, in full compliance with the Customer’s needs and current regulations.
Integrated Systems

DABsi is the DAB Group’s leader company for the implementation, management and maintenance of Integrated Security, Safety and Technological Control Systems.

It guarantees implementation of innovatory project systems for Security with the highest standards of efficiency and professionalism, in the strictest compliance with laws governing the sector and the environment.

Teams of technical experts and engineers are at Customers’ complete disposition to deal with every Security need in the widest range of sectors, including:

- Video-surveillance and Access Control Systems
- Intrusion Detection (Perimetral and Building)
- Fire Detection and Extinguishing
- Telecommunication Networks
- Environmental Monitoring Systems
- InfoMobility
- Buildings Automation
- Supervision Systems and Control Rooms

DABsi proposes the Advanced Integrated Security Model based on complex scalable and performing platforms that can bring added value to the control process via correlation of information.
Consultancy and Training

This Company Division provides backup to Customers during risk analysis and management phases, process and model updating, Budget and investment control, as well as personnel training.

Personalized consultancy and personnel training, guidance and updating services are provided by means of:

- Risk Assessment and Security Survey
- Security Model
- Security Process Reengineering
- Security Budget optimization
- Security Training
- Training Courses
- On-the-job training modules
- Workshops, Congresses and International Forums

The Consultancy and Training division provides appropriate answers to every single and diversified Security need, transferring knowledge, skills and professionalism.
