

Technology Centre for Security

A centre of excellence for Safety & Security
Your Security Partner

We deliver results and guarantee top Safety & Security

Working to protect social and industrial development

Technology Centre for Security

↓ CLIENT BENEFITS

Gruppo DAB's practitioners will help you analyse your needs and security threats, providing services and solutions while supporting your compliance and business requirements.

Gruppo DAB's engineers and consultants are the best partners to share your security challenges: they will help you to find your best solution saving costs and expenses.

Company strengths:

- Nato Security Clearance
- Highly Skilled Personnel
- Long Term Company Experience
- Integrated Solutions
- Partnership with main equipment suppliers

↓ A CENTRE OF EXCELLENCE FOR SAFETY & SECURITY

Founded upon 35 years of success in the Security Industry and a great number of Security Solutions delivered to customers, now Gruppo DAB establishes an innovative approach to Safety & Security.

At the leading edge of Safety & Security, Gruppo DAB operates as a centre of excellence providing a high level of support to clients with complex security requirements both in industrial and public sectors.

Total Security Management

We provide competencies, strategies and advanced technologies to perform a new model of Security

↓ LOCATIONS

Gruppo DAB's operations are located in two main offices: a headquarter in Rome, and a local office in Bologna for the operations in the North of Italy. Further Technical Assistance Centres (TAC) are located in Italy and in foreign countries.

The 5500 m² headquarter has been designed to promote the cooperation between the R&D and the technical department in order to provide the client with the leading solutions.

Every year Gruppo DAB organizes meetings and workshops to promote a new "culture" of Security. The events take place in Gruppo DAB's Conference Centre, that can host up to three hundred people.

↓ COMPETENCIES

Competencies and experience are the key factors for a "fitting" use of technology. Risk Analysis, Risk Assessment and Security Plans are the enablers of matching technology with clients' processes.

Many years of experience in different sectors and industries enhanced our capabilities to understand industrial and public requirements, integrating services and technologies and delivering customized solutions.
