INNOVATION AND INTEGRATED
GLOBAL APPROACH

**WE DEVELOP
INNOVATIVE
SOLUTIONS**

The nature of our work sends us out into the world, starting from the social realities and areas that we have always protected.

The security challenge can only be won if you arrive on the scene before the potential threat and if you can provide instant, relevant and long-term solutions, in line with the highest quality standards.

This awareness is the key to DAB Sistemi Integrati's quest to fulfil any security request by promoting scientific and industrial research and employing the very best professional approach.

Our work is structured by certified protocols which guarantee our reliability. Our security model offers an Advanced Integrated Security System, based on platforms that allow you to communicate with the outside world, analyse and correlate the information collected, providing added value to the control process.

ANALYSIS AND DESIGN

The best human resources and our proven track record are at your disposal for the development of basic and detailed projects, feasibility studies on Security, Safety and Technological Control. The company division carries out engineering activities, drafting of technical specifications, work management, testing, assessments and audits. It also deals with design in all its operational facets and takes care of the entire implementation stage, in particular:

- *Special installation Security Systems*
- *Territorial control and monitoring systems*
- *Telecommunications networks*
- *Technological systems*
- *Environment monitoring systems*
- *Electrical systems, Structured cabling and Automation*
- *Operations centres and Surveillance systems*

SOFTWARE DEVELOPMENT & INTEGRATION

The company division is responsible for the design and development of the PSIM Galassia software platform through integration with a variety of the most popular, commercially-available types of sensors, apparatus and security systems.

We are committed to ongoing research and the implementation of new features, to ensure that the product we offer is competitive and aligned with customer needs and new technological developments.

SYSTEM IMPLEMENTATION, MANAGEMENT & MAINTENANCE

The company division guarantees the implementation, management and maintenance of innovative project solutions for security with high standards of efficiency and professionalism in strict compliance with the standards for the sector and the environment. Teams of technicians and engineers are at the complete disposal of customers to fulfil all their security needs in a wide variety of sectors including:

- *Videosurveillance and access control systems*
- *Intrusion detection for perimeters and interiors*
- *Fire system*
- *Infomobility*
- *Building automation system*
- *Command and control PSIM platforms*

AREAS OF INTERVENTION

INDUSTRY AND COMMERCE

The company creates advanced integrated security solutions with the goal of protecting customer intellectual property, infrastructures, systems and products in industry and commerce, whilst guaranteeing their business continuity.

CITY AND TERRITORY

We implement innovative and reliable solutions for the security of cities and the territory, safeguarding inhabitants, property and communal spaces.

UTILITIES AND ENERGY

We create custom security solutions for critical utilities and infrastructures, guaranteeing business continuity and minimising the risks caused by the interruption of primary services.

INSTITUTIONAL SITES

We set up building security and automation solutions which integrate all the security aspects for institutional sites in a unique system.

TRANSPORT

We create solutions which fulfil security requests in the transport sector in full compliance of the specific standards.

GLOBAL VISION

In a period of time marked by new threats and daily safety risks, we work to guarantee what we care about most: your security.

DAB Sistemi Integrati, market leader in Security, Safety and Technological control, firmly believes in the importance of a culture of security.

For over forty years, we have successfully dealt with all problems related to the protection of people, property and territory, seamlessly leveraging each area of our business: Research, Development, Consultancy, Design, System Implementation, Technological Control, Telemonitoring and Videosurveillance, Training.

We accurately profile critical issues in advance and define solutions by combining knowledge and technology.

We agree in advance with our customers on the project and process strategies, objectives and methods involved and carefully plan all necessary actions.

Quickly creating effective solutions to turn customer expectations for prevention and control into reality.

Our know-how allows to rationalise investments and management costs by maximising the results real security.

We operate throughout Italy through country-wide support centres, offering 24/7 availability services.

OUR **INTEGRATED** APPROACH AND **INNOVATIVE** SOLUTIONS

ARE DESIGNED TO IMPROVE THE PROCESSES,
SYSTEMS AND RESOURCES FOR YOUR
GLOBAL SECURITY

**DAB
SISTEMI
INTEGRATI**

DAB

The company, a **leading system integrator in the development, management and maintenance of Advanced Security, Safety and Technological Control Systems**, was founded in 1972.

DAB Sistemi Integrati guarantees the protection of your assets by employing a team of professionals and adopting advanced systems, from access control to the management to virtual reception management, people counters, Building Management Services (BMS) and Building Information Management (BIM).

The company also keeps up with new demands in the digital era by developing skills and solutions that are consistent with the new topics of artificial intelligence, IOT, cloud platforms and cyber security.
